

4000 WA

QUATTROLIFT®

4000 WA

The Quattrolift 4000 WA, together with the wide range of Hofmann 3D wheel aligners, offers the perfect combination for wheel alignment of all vehicles from passenger cars, SUV's, transporters up to mid sized vans.

Control unit

Clear and easy to understand, with emergency switch and comfort lowering which allows the automatic release of the carriage from the safety lock when lowering the lift.

Jack (optional)

The sliding jack increases versatility as lift also can be used for brake service.

Turntables (optional)

The turnplates are perfectly integrated in the runways and can be placed in 3 different positions to support a wide range of wheel bases.

Safety ladder

With safety locks every 100mm to set the runways in the locked position for wheel alignment.

Cable system

The rugged brass pulleys ensure long life of the lift.

Rear slip plates

The integrated rear slip plates guarantee that a four wheel alignment can be performed on all vehicles with wheel bases from 1.930 mm up to 4.150 mm. For best sliding performance each slip plate is equipped with 3 sections with a total of 120 rollers.

Ramps

Designed to allow cars with lowered chassis to drive on the lift without any damage.
